

About the Role

We are seeking a visionary and deeply experienced **Chief Technology Officer (CTO)** to lead our technological strategy, innovation, and execution. This is a pivotal executive role responsible for overseeing all aspects of technology, product architecture, infrastructure, and user experience across the organization.

The ideal candidate is a **seasoned technology executive with 25+ years of progressive leadership experience**, extensive hands-on knowledge of **Kubernetes and cloud-native systems**, and a sophisticated understanding of **user experience and design thinking** principles. Multilingual fluency in **German, Russian, and English** is essential to coordinate effectively with our diverse global teams and partners.

Key Responsibilities

Technology Leadership: Define and drive the company's long-term technical vision, architecture, and innovation roadmap.

Team Building & Mentorship: Lead and grow high-performing engineering and product teams across regions.

Kubernetes & Cloud Expertise: Architect, scale, and optimize distributed systems with a focus on container orchestration, microservices, and infrastructure automation.

UX Oversight: Champion intuitive, elegant user experiences; collaborate closely with design and product teams to integrate UX into every layer of the stack.

Strategic Partnerships: Engage with clients, stakeholders, and board members across German, Russian, and English-speaking markets.

Security & Compliance: Oversee compliance with security standards, data protection regulations, and risk management protocols.

Innovation & R&D: Stay ahead of emerging technologies and ensure the company maintains a cutting-edge competitive advantage.

Budget & Vendor Management: Allocate technical budgets, manage vendor relationships, and optimize for cost-efficiency and scalability.

Requirements

25+ years of experience in software engineering, infrastructure, and technical leadership roles, with at least 10 years in executive positions.

Mastery of **Kubernetes**, CI/CD, DevOps, and scalable cloud-native architectures (GCP, AWS, or Azure).

Proven success in UX/UI integration and design-centric development environments.

Advanced experience with enterprise systems, security frameworks, and agile methodologies.

Exceptional communication and leadership skills with a track record of building cross-functional teams.

Fluency in **German, Russian, and English** (written and spoken) is mandatory.

Master's degree or PhD in Computer Science, Engineering, or related technical field is highly preferred.
